

3 Kings Fabrication Group (Pty) Ltd

Specialists in Steel Fabrication and Industrial Doors

WHO WE ARE

3 Kings Fabrication Group (Pty) Ltd was established to address a critical gap in the steel fabrication and industrial door sector — reliability. In an industry where commitments are often made but not honoured, we built our company on a different foundation: integrity, transparency, and delivery.

We do not overpromise. Instead, we are committed to:

- Gaining a clear understanding of each client's operational requirements
- Providing practical, technically sound solutions
- Offering transparent advice on all available options
- Honouring every commitment, we make

Our clients work with confidence, knowing exactly where they stand at every stage of a project.

OUR PHILOSOPHY

At the core of our organisation is a simple principle: **our people are our greatest asset.**

We foster a culture of accountability, continuous improvement, and professional responsibility. Challenges are addressed decisively. Mistakes, when they occur, are corrected promptly and to the highest standard. Continuous learning is embedded in our operations.

We currently maintain an **88.9% on-site response rate within 2.5 hours of booking**, and we are committed to improving this performance benchmark consistently.

We understand the operational pressures faced by maintenance managers, operations teams, and facility supervisors — professionals tasked with keeping critical infrastructure running within strict budgets and timelines. Unexpected breakdowns, accidental damage, and urgent repairs do not wait for procurement cycles. Our role is to ensure that your operations continue with minimal disruption.

OUR EXPERIENCE

With nearly **31 years of specialised industry experience**, we have navigated the full spectrum of technical, structural, and operational challenges within the roller shutter and steel fabrication environment. This depth of knowledge enables us to deliver engineered solutions that are structurally sound, operationally reliable, and built for longevity.

Our services include the manufacturing, installation, servicing, repair, modification, and maintenance of:

- Industrial Roller Shutter Doors
- Sectional Doors
- Domestic Garage Doors

We do not view our work as a once-off service — we view it as a long-term investment into our clients' operational continuity.

OUR CORE SPECIALISATIONS

Industrial Roller Shutter Doors

We design, fabricate, install, service, repair, and modify industrial roller shutter doors of all specifications and dimensions.

Notable Achievement

We successfully engineered and installed the **largest industrial roller shutter door in the Southern Hemisphere**, measuring: **11,200mm (W) × 9,000mm (H)**

We are equipped to manufacture doors up to **15,000mm in width**, subject to engineering requirements.

Yard Ramps & Dock Levellers

We design and manufacture custom yard ramps built to meet specific operational demands, including:

- Deck capacities ranging from 8 tons to 25 tons
- Stationary or mobile configurations
- Applications for:
 - Cattle and game loading
 - Heavy vehicle and truck loading
 - Forklift operations

Each unit is engineered for structural integrity, safety, and durability under demanding working conditions.

Steel Fabrication & Turnkey Projects

Steel fabrication is our core discipline.

Our expertise includes:

- Industrial Roller Shutter Door Manufacturing and Refurbishment
- Yard Ramps
- Truck Guides
- Trailers
- Steel Staircases
- Sliding Gates
- Structural Steelwork
- Warehouse Extensions and Expansions

From single installations to comprehensive turnkey steel projects, we deliver solutions that enhance operational efficiency, structural strength, and long-term value.

OUR COMMITMENT

Should you have experienced delays, communication failures, or unfulfilled commitments in the past, we invite you to engage with a contractor that operates differently.

We welcome the opportunity for a brief introductory meeting to demonstrate how our structured approach can support your operational requirements.
